

## Intelligens GNS deployed across Northern Ireland

to monitor gas networks and support rapid detection of fluctuation events

### About Intelligens GNS

Intelligens GNS is the innovative, ATEX approved data logger designed to monitor pressure points in gas networks.

Designed to reliably and securely transmit continuous data, Intelligens GNS ensures that maximum design pressures are not exceeded, without ever compromising a reliable supply.

Intelligens GNS can be used in combination with a variety of digital sensors, including pressure and temperature sensors, delivering an effective gas network monitoring solution.

Firmus Gas is known as the natural gas specialist and provides safe, low cost, practical and environmentally friendly natural gas to the majority of homes and businesses in Northern Ireland.

Known for first-class customer service, Firmus Gas is dedicated to building Northern Ireland's infrastructure and to protecting the environment.

As a company that puts its customers first, Firmus Gas is constantly looking for new and innovative ways to meet their customers needs simply, efficiently and courteously.

Currently their focus is ensuring the continuity of gas supply to their entire customer base with the ability to provide a rapid response to any event.

With these objectives in mind, HWM has introduced Firmus Gas to our innovative, ATEX approved, **Intelligens GNS** logger.

Intelligens GNS has been developed by HWM and measures network pressures and, more specifically, pressures at governor stations.

Intelligens is designed for use at pressure reduction points across the network, ensuring that pressures are within the specified range, without ever compromising a reliable supply.

Intelligens GNS also benefits from two-way connectivity enabling the unit to be reprogrammed remotely, without the need for costly site visits. New alarm conditions can trigger an alert to multiple recipients, and the device can provide accelerated dial-in and sampling functionality during such events to make data rapidly available.

This enables operators to respond promptly to changing levels, ensuring minimum disruption to supply.

Firmus Gas prides itself on 'going the extra mile and providing exemplary customer service at the lowest possible price'.

With the support of HWM and our flexible Intelligens GNS logger, Firmus Gas can continue providing exceptional customer service while also protecting the environment.
