Project Manager – Data Loggers

About Us

HWM is a leading manufacturer of utility monitoring solutions developed to save customers water, energy, time and money. Our services include the design and manufacture of telemetry equipment, along with installation and data delivery expertise. We have over 30 years' experience delivering services to the water, wastewater and gas sectors.

Job Purpose

Due to continued expansion and success in securing further contracts within the UK water industry, HWM is recruiting for the role of Project Manager.

Role & Responsibilities

The role will see the successful candidate responsible for managing and delivering our data logger installation projects with the UK's central region. The role requires you to be the lead interface with the client and managing an installation project through to the current maintenance regime to existing Service Levels.

Key liaison between, client, installation contractor, internal procurement and production is paramount. You will be responsible for project reporting mechanisms for both internal and external stakeholders along with the tracking of materials consumption between HWM and the client.

Skills and Experience

The role would suit an individual with not only previous experience in this field of expertise, but also the following skills and attributes: -

- Project Management experience
- Commercial and Contractual awareness
- An ability to communicate across various personnel levels
- Experience of Service Level Agreements (SLA's) within the industry
- People and performance management skills
- Experience meeting clients demands
- Business Development experience
