

Pegasus 2 LTE-M & NBIoT-enabled Pressure Control System

Pegasus 2 is an advanced pressure control system that utilises our innovative modem (capable of connecting via LTE-M, NBIoT, 4G, 3G and 2G) for reliable and low-powered two-way communication.

With the capability to set target pressure by time, flow or a combination of both (with different table settings per day), Pegasus 2 delivers a sophisticated level of targeted control, even on a time basis.

Pegasus 2 features a secondary channel for fast logging down to 25Hz. This is invaluable for investigating system transient events.

Key Features and Benefits

- **Telemetry:** NBIoT/LTE-M based cellular communication as standard with fallback 2G capability
- **Modulated control:** provides great flexibility to modulate pressure according to demand throughout the day with changes being made remotely
- **Multi-point time based PRV:** control without flowmeter 96 values per day, 7 days per week
- **Pressure failsafe:** set by user on installation, including manual safe override on site
- **Intelligent pressure control:** proven to minimise leakage and reduce the frequency of pipe bursts
- Latching solenoids: optional feature to fully open or close the PRV top chamber in tight headloss, or network fault conditions
- Integrated low cost telemetry: enables rapid monitoring and remote control as required
- **Closed loop control:** optional closed loop control automatically modulating pressure from remote critical point data
- **System configuration:** easy to set up locally via tablet or PC app and remotely via PressView Cloud Server

- **Transient logging:** high speed logging to 25Hz to identify network transient events
- Value Performance Monitoring: logging top chamber pressure and solenoid activations to continually monitor value performance

Applications

Pegasus 2 uses a Windows Tablet or PC based IDT app for easy programming and is compatible with the PressView Cloud System for easy and convenient data access and remote configuration.

Pegasus 2 transmits data through an integral modem with 2G, 3G, 4G, NBIoT and LTE-M (Cat-M1) options available.

In addition, PressView web based software provides location fleet mapping, installation photos, graphing, remote table control, alarm setting and maintenance alerting.

Individual user actions are logged and any changes made on the operation of Pegasus 2 are logged against the user, making any actions fully accountable and historically registered.

Sensor Input Options

	2x Digital	2x Uni- or bi-directional pulse. Count or Event logging modes	
	2x Analogue Inputs (additional third channel available on request)	Internal Pressure Transducer. External pressure. 4-20mA (optional). 0-20 bar / 0-200 meters head / 0-300psig, 0.1% repeatability / please note that the logger is calibrated to 10 bar as standard. (20 bar calibration must be specified at time of order if required) Leak noise, 0-10V, 0-1V, temperature or 4-20 mA variants	
Hydraulic			

1x Latching Solenoid, to vent or close the top PRV chamber. 2x Pulsed Solenoid outputs, up/down **3x Solenoid Outputs** control. Safe levels and alerts set to protect battery depletion.

Communication

Mobile	Cellular modem supporting 2G/3G/4G/NBIoT/LTE-M (Cat-1) - contact HWM for available options
Serial	RS232 or USB interface for programming and integration with PC/Laptop or Windows Tablet using IDT software. Programmable up to 19,200 b.p.s

or revert to fixed pressure (operator selected) **Logger Features** Variable logger sample rate from 1s to Frequency 24hrs (this may affect battery life and communication costs) 7 alphanumeric characters. Readable Logger/Site ID factory set serial number in firmware **Ingress Protection** IP68 fully submersible 315H x 153W x 87D mm Dimensions (12.4" x 6.0" x 3.4")

Clock is programmable for seasonal

Up to 96 table entries for 7 individual days per week or setting based on

Default Fail Safe can be configured to 'Set' or 'Release' the latching solenoid upon error (e.g faulty sensor/no flow)

or revert to time profiles if flow fails

Week Days or Weekends. Calendar special event table also available Flow based control, or Flow override

time changes

option

Construction	Aluminium alloy casing
Weight	Approx 3.5kg
Operating Temp.	-20 to +60°C (-5 to +140°C)
Power	Lithium-thionyl chloride cell operational for 5 years under typical operating conditions
Alarms	Multiple alarm options including Rate of Change, Profile, Minimum Night Flow and Threshold. 16 alarms per logger. Can be programmed to auto dial up to 8 telephone numbers on alarm. Over 16 alarms per logger depending on channel configuration
Memory	Primary recording 179,760 readings (Cyclic or Block)
