

Patroller II

Data transmitting device

Patroller II system enables data transmitted by Permalog+ leak noise loggers to be collected wirelessly in a moving patrol vehicle.

The Patroller II can be set up and operated using a PDA or laptop running dedicated software.

Key Features and Benefit

- **User friendly:** Easy to use software
- **Radio programming:** Full programming and download via radio
- **Improved graphics:** Display options via laptop/PC software.
- **Quick set up:** New intuitive user interface to enable rapid set up of DMA's and patrol windows
- **Flexible:** Configurable options
- **Long battery life:** Rechargeable giving 8 hours operation
- **Alarm function:** Available alarm to increase driver safety (alarm will sound when a Permalog+ noise logger is detected)

Applications

The large graphical display screen makes viewing incoming data much easier during the patrol. The user can view detailed information from each logger in graphical and table format.

The data presentation screen is fully customisable, allowing users to select exactly which information is displayed during a patrol. A wide range of data fields are available – including serial number, location details, level and spread, leak status, patrol time, address and GPS co-ordinates.
