METER READING**

# Radwin

## Extensive Radcom software suite

Radwin software is the generic term for an extensive range of software modules and specialist applications designed and supported by Halma Water Management (HWM-Water Ltd) for their Radcom range of data loggers.

Radwin offers icon driven communications, data storage and graphing for the acquisition of data from loggers and controllers. It is ideal for setting up and downloading data from any HWM Radcom data logger on site using a Laptop PC, in the office using a desktop PC, or via PSTN or GSM/SMS telemetry links.

### Key Features and Benefits

- **Market Leading Software:**  
Developed over 20 years
- **Automatic communication:**  
Automatically communicates with HWM DataGate or existing FTP site to receive data
- **Flexible:**  
Supports all HWM Radcom Data Loggers
- **Easy data storage:**  
Enables easy data storage on the host PC
- **Multiple graphical view options:**  
Data can be examined in table format, graph format, or exported into other packages
- **Data export feature:**  
Data can be sent directly via email, which the software will automatically import

### Applications

Radwin provides a simple to use extensive graphing package for data analysis with windowing and zooming functionality. Data can also be examined in table format on screen, or exported into other packages. It is compatible with Windows XP, Vista and Windows 7.

Radwin communicates automatically with HWM DataGate and can be configured to work with an existing FTP site if required. The software and loggers can also be linked to a POP3 email server so that data can be sent directly via email, which the software will automatically import into the database.
