Title – Autocall SMS to Datagate

(Issue 1)

How to configure Radwin Autocall to upload data to Datagate / HWM Online

In order to configure your Radwin software correctly please complete this procedure -Open the 'Radwin View' module of your Radwin software and go to 'Options', 'System Configuration', Select 'Advanced' from the drop down -

	(1)
System Configuration : View - Advanced Origan: Index configuration : View - Advanced Index configuration : View - Advanconfiguration Index configuratio	Radwin View Sector Image: Sector Result Totic (sector Result) Image: Sector Result) Information Result Image: Sector Result Information Result

Then select 'Radwin All' and navigate to the 'Autocall Ports' tab and locate your SMS modem port (in this case COM4)

	System Configur	ation : Radwin All	×

Double click on your selected COM port (COM 4) to open it and from the 'Connection Type' dropdown select 'SMS to DataGate', and enter the relevant details and the HTTP configuration for HWM Datagate or your local version then select 'OK'

Configure Port ×			
Select Enable Port to use this port with Autocall. A Connection Type must be specified which determines how this port is used to talk to loggers. The default baud rate is only important if this
