

FAQ0369

Version: 1.0

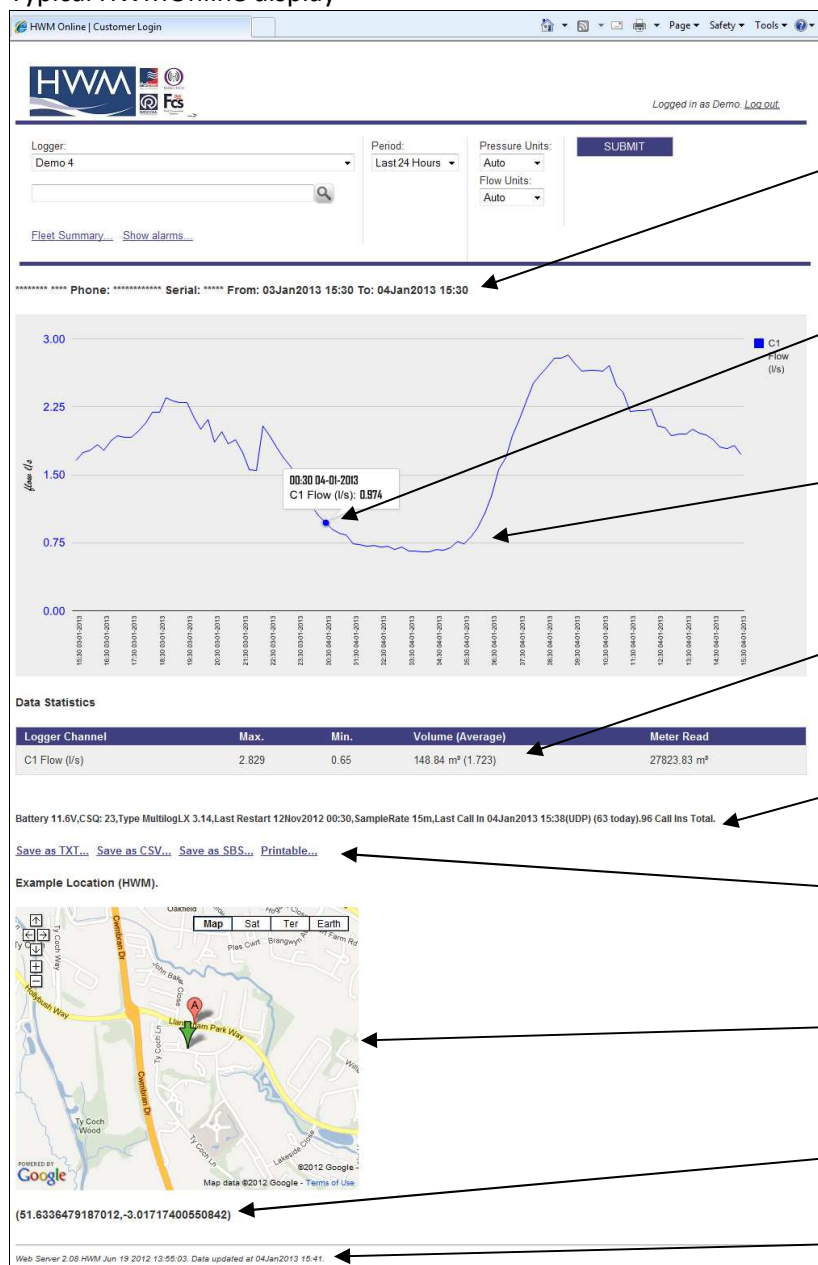

Title – Summary of HWMO Graph view

Made By: AE 21/07/16

(Issue 1)

Summary of details provided by HWMOnline / Omnicoll

1. Typical HWMOnline display

Details of the logger including last data point in time in **Logger Time**

Floating the mouse over points on the graph gives precise detail in **Logger Time**

Graph of the readings recorded by the logger, one trace per channel.

Key statistics derived from the graph for each channel

Logger current health information in **Server Time**

Options to export data in various formats of offline analysis

Map showing location of logger (if recorded on DataGate™) and position of Cell Tower providing coverage.

Latitude & Longitude GPS location of the logger (if available) for entry into Satellite Navigation devices.

Website details including last update in **Server Time**

Note: The resolution of the graph reduces the more data you display. If you wish to zoom into an area of interest, use the "Custom" time Period and enter the precise range you wish to view.
