

**Ref: FAQ0419****Version: 1.0****Title – ‘SSenseQ’ channel definition****Made By: AB 31/10/17****(Issue 1)**

Intelligens with SonicSens SSenseQ Channel explanation

The ‘SSenseQ’ channel indicates the ‘quality’ of the SonicSens echo as a percentage.

In spot mode it will either be 100% (good echo) or 0% (lost echo)
In average mode it will be the percentage of good echo’s seen in the logging period.
