	Getting Started Setting the Database Path Setting Comm Ports Configuring a Logger
	Introduction
Advanced Download/Upload/Utilities	Radwin Lite is a simple to use, cut down version, of Radcom's Radlog for Windows software. It allows loggers to be configured and downloaded using wizards, and provides bacie graphing functionality, data statistics and data export.
Type: BLoLog Flath  Baut  S 5000  Consection:  Provide CO20	Getting Started
Number	It will be necessary to specify where data is to be stored, and the corm points that are to be used for communicating with loggers. Radvin Lite effores all logger information in a databace. This database is compatible with Radlog for Windows, allowing Radvin Lite to be upgraded to the full Radlog for Windows if required.
C - Download Late Number Of Hours Data	Setting the Database Path
C Download Logger Memory From Address: 0 0f Length: 0	Menu - Configuration / Basic Configuration
OK Cancel	Select the 'System' tab. This will display the database configuration.
	The default location for this database is in a folder name? Otab block the folder where Radwin Life was installed e.g. "c.Radwin Life/Data" your may wish to change the default folder, especially rusing a shared a database on a sherwin, so multiple users may be the strength of the strength of the databases. This may be a new database on set to an ostibut Radwin Life (or Radog for Windrowy) database. The method of selecting loggers from the database may also be specified here. The opports are Single defaulty, where each logger to displayed as a single 7 digit defined to pask is donther in the 2 components, a zone and a location. This method requires a const on a location. This method requires a solution to the market sharelet location.
