	Ref: FAQ0176	Version: 1.0
	Title – MicroCORR 6 Calibration message	
	Made By: AB 17/09/15	(Issue 2)

MicroCORR 6 - how to override the calibration requirement

On MicroCORR 6 there is a sequence to go through to eliminate the Calibration message as follows:-

1. Power on the unit.
2. Press 'Menu' button
3. Select 'Print' then '02' then 'Enter'
4. Select 1 (Print list) then 'Set' then 'Enter' - make sure **OPTION 1 (print)** and **SET** are pressed simultaneously and then enter.
5. At the Calibration screen you will see a Date of calibration entry. If you enter the date with a year entry of 99 (corresponding to 2099) you should not see the message again (until 2099!)
