Title – MicroCORR + radio testing

Made By: AB_06/02/14

(Issue 1)

Question – How to test the radios in a MicroCORR +

This can be carried out using the “Radio Test” and “Signal Strength Meter”

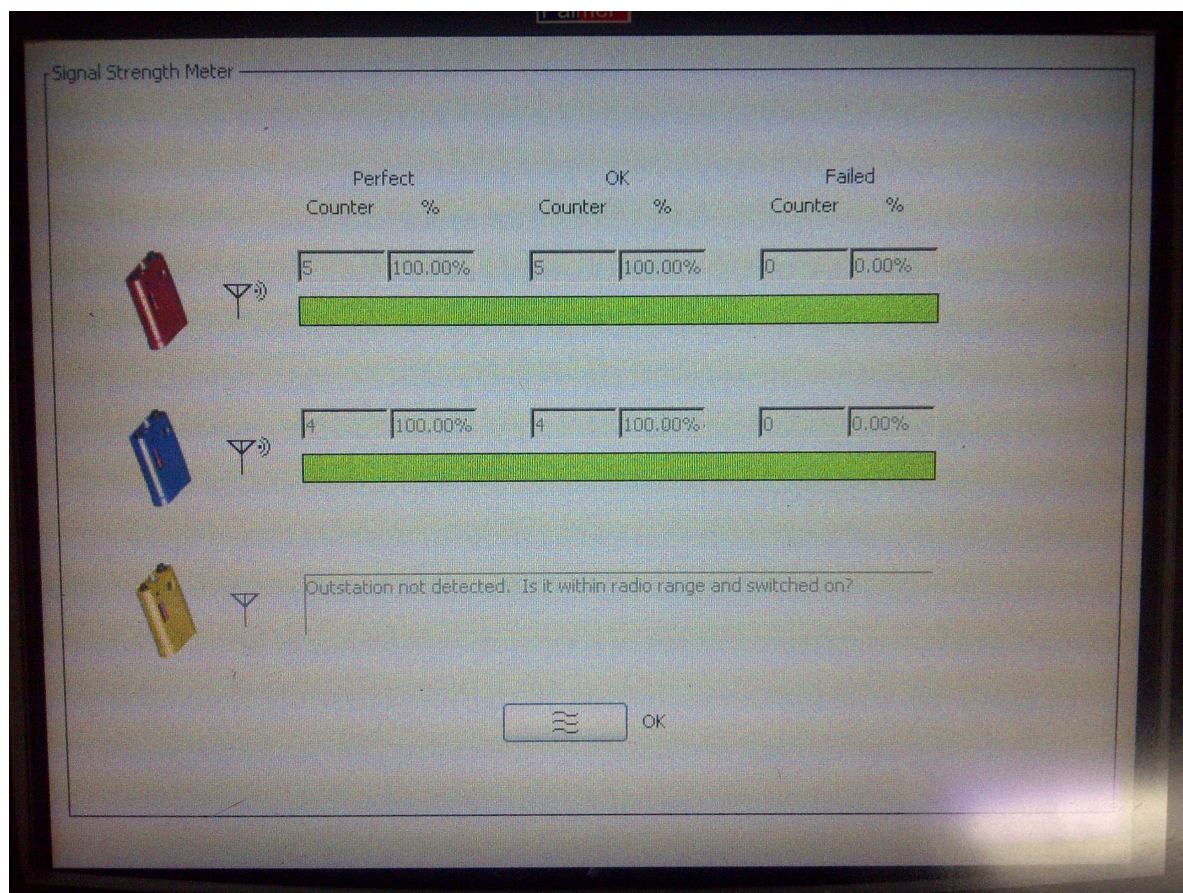

From the Main Menu

Select Option ‘6’ for Information

Then select option ‘4’ for Diagnostics, or Select option ‘5’ for Signal Strength Meter

And then select Option ‘2’ for Radio Test

The test should pass with a percentage rate of 80%+ as per the screen shots below.
