Title-Multilog & LX remote configuration

Made By: AB 17/09/15

(Issue 2)

SMS Multilog and LX – using a desktop modem to remotely reconfigure the logger settings

This method of reprogramming a Multilog or Multilog LX is via SMS so the logger does not need to be in a power window. However because of a limitation in Radwin, a Senator + can only be remotely reprogrammed during its power window.

Start Autocall with your SMS modem set up

In Radwin View, select download options > advanced download/upload/utilities

Select Download/upload,

Select Enter New Parameters

Advanced Download/Upload/Utilities

Logger

Zone... BAR

Location... D189 Clarence Road

Type: Multilog Flash GSM/SMS

Connection: SMS Modem

Baud: 9600

Port: COM1

GSM Data Number:

SMS Voice Number: +447912996503

Last Known Power Windows...

Download/Upload | Utilities

☒ Enter New Parameters

☐ Download Parameter Settings For Last Recording

☐ Download Parameter Settings And All Recorded Data

☐ Download Last Number Of Days Data: 30

☐ Download Logger Memory From Address: 0 Of Length: 0

OK Cancel

Click OK

Then Click on Call Times
