

**Ref: FAQ0194****Version: 1.0****Title – Multilog memory capacity****Made By: AB 17/09/15****(Issue 2)**

Multilog Memory capacity defined

1. Multilogs can do 1sec to 24hr sampling, however, faster sampling rates affect the data transmission cost (SMS) and battery life. (The quoted battery box lives assume 15min sampling.)
2. The memory in the Multilog can store the following -

Channels	Readings	Duration @ 15min sampling
1	48672	507 days
2	24336	253 days
3	18252	189 days
4	12168	126 days
