Title – Permalog + how to save history

(Issue 2)

## PC Patroller software - saving 29 days of historical data as a .csv file

The P+'s latest 29 days of historical data can be downloaded by the PC patroller software, and can also be saved as a 'CSV' file. The following process defines how to do this -

🐻 History																					
AEG> Patroller Help Save as a CSV File Save as an Aqualog Fil Exit Ferminalog + (14)	Level + Sp	read Histo	ory   Hi	stograr	ns														i i		: Tx
0208-2313 0208-2318	Read His	tory	Clea	r Table		Sensitivit Normal	y :	•													
0310-1646 0807-0064		Latest	-1	-2	-3	-4	-5		-7	-8	-9	-10	-11	-12	-13	-14	-15	-16	-17	-18	-1
1109-3180 1109-3237 1109-3260 1207-2745 1207-2749 1207-2760 1207-2762 1207-2787 1207-2792 1207-2796	10-1646   Level : Spread : Leak :	0 0 N	0 0 N	0 0 N	0 0 N	0 0 N	0	0 0 N	t t												
Reading 100% successfu		Data rea	d ok.					Conne	ected to	Patroller											

The "Save as CSV File" menu item shown in the screenshot is valid only for the downloaded histograms, not the 29-day Level & Spread History. It is not part of the PDA functionality either, and this is what the PC Patroller software was based on.

However, there is another way that this data can be saved : -

Open the Administrator Options screen and ensure that the "Add History to database" box is checked (as shown below).

If this option is **\*not**\* checked, the 29-day history that is downloaded will only be shown on the screen and cannot be saved.

If this option is checked, the downloaded history will be entered into the database as if the logger had been patrolled for the last 28 consecutive days.

Options	
Ble	
Functions       Lift + Shift Options       Other of         Select Permitted Functions and Option       Patrol         Patrol       Fast Patrol         Allow export of all patrol data       Patrol data         Allow export of current data only       DMA Management         Import DMA structure ONLY (No patrol data will be read)       Deploy         Allow deletion of loggers       Data Analysis         Allow data editing + logger deletion       History         History       Add history to database         Erase history after download       Faste download	Dptions Change Administrator Password S V Lift + Shift V Aqualog V Allow deletion of graphs V P + Setup V Patroller Setup
	OKX Cancel

The downloaded data can then be viewed, filtered and saved by using the Data Analysis screen in the normal way.
