

**Ref: FAQ0324****Version: 1.0****Title –Permalog + available frequencies****Made By: AB 22/09/15****(Issue 2)**

Permalog + available operating frequencies for different territories

Customers will need to request information from HWM Sales department on the suitability of different frequencies for their particular application.

HWM does not publish a catalogue or data sheet of available frequencies – this is primarily because we have to be careful with each sale that the frequency we are supplying is properly licensed for the location it will be used in.

The versions of Permalog + which can be supplied are -

<u>Part Number</u>	<u>Frequency</u>
PR4CN4	433MHz
PR4CN7	784MHz
PR4EU	869MHz
PR4HK	919.75MHz
PR4JPN	321MHz
PR4US	914MHz
