Title – Set up PDA for Emailing

Made By: FM 28/01/16

(Issue 1)

How to set up a Permalog PDA for emailing data

Insert Sim Card

1. Ensure the PDA is switched off
2. Remove the back cover
3. Slide battery latch
4. Remove battery
5. Slide Sim latch to open
6. Insert Sim
7. Slide Sim latch. Insert battery. Slide battery latch. Replace back cover.

Enable Data Settings

These settings are specific to Sim cards from DataSIM. Required settings will need to be confirmed for other providers.

1. Ensure PDA is switched on
2. Launch connections settings from:
3. Windows icon -> settings -> connections -> connections
4. Select 'Add a new modem connection'
5. Enter a name for the connection
6. For modem select: Cellular line (GPRS)
7. Click Next
8. For access point name enter: mobiledata
9. Click Next
10. Leave username and password blank
11. Click finish
12. Click Ok to exit

Test GPRS connection

1. Launch internet explorer
2. Enter 'google.com' in the address bar and press the navigate button
3. Ensure the Google homepage is shown.

Configure Patroller PDA

1. Launch Patroller PDA app from:
2. Windows icon -> Patroller
3. Select: Menu -> option
4. Enter passcode
5. On the History Tab enter the Server Url and Server Account. These will differ for different users so these settings will need to be confirmed with Sales/Engineering.
