Title – Radwin Data base - Delete loggers

(Issue 1)

How to delete zones and Locations (loggers) from a Radwin database

Deletion of Locations (Loggers) from a Radwin database -

In Radwin Software open the View module and select the 'Open Data File' Icon at the top left hand side of the screen -

With the Data base open expand out each Zone by clciking on the '+' to its left

🗳 Location Select - Data Time Period	- 🗆 🗙

	Dele	te Location	×	
	Select OK to delete th deleted if it contains r	e Location. A location can only be no data. Use search function sets	Ŷ	
Zone: Select (25 DK To Delete The Locat	Alnwickhill WOA		
	012	Beaverbank DMA		
	Search Functio	n Sets For Logger ID		
		OK Cance		

Confirm this is the logger location you wish to delete (and if necessary remove any Function sets it is associated with) and then Select 'OK' – you will then get the caution warning below -

Delete Location and Data	
The location contains data. Do you wish to continue and delete the data.	
Yes No	

Selecting 'Yes' will confirm the action and delete the database location.

Deletion of Zones from a Database -

A similar process can be used to delete the Zone- but this can only be done when all the loggers in the Zone have been deleted. It is not possible to delete a zone which still has locations in it.

Select the Zone and right click on it -
