Title-Radwin database – logger lists

(Issue 2)

Radwin Database - how to extract a list of all loggers GSM Call out times and / or other logger configuration information

GSM call out times can be generated by Database Export

You can export a list with the GSM call out times.

In Radwin software go to 'Start' and select 'Radcom Database Export'

Then 'Options' > 'Export database as ASCII'

Select the database locations to export.		
atabase Export Options -		
Zone:	All Zones	
Location:	All Locations	
Export All Zones and	Locations	
C Select an Entire Zone	to Export	
C Select a Single Location	on to Export	

Select 'Export all Zones and locations'

Highlight items in the Sele order they are inserted de	ect list and s etermines the	elect 'Add' to place e ASCII file column	them at the end of the S order. Use "Insert' to inse	elected list. The 🧍
