Title-Radwin database merging

Made By: AB 21/09/15

(Issue 2)

Radwin Database merge from a Laptop PC to a Desktop PC (for example)

First find the Radwin Data folder on your Laptop PC – the data folder is the one located just below your Radwin Software – use your PC's Explore facility to locate this and copy it complete to a known position on your desktop PC – see below screen shot

Now on your desktop PC open Radwin Data Export (also know as Radwin Import/Export). Then click Options \rightarrow Import Merge Database.

The Import Merge Configuration popup box will appear. Click the New Configuration radio button, and then click the OK button.

| Import | Import Merge Configuration | | | | |

atabase merging

(Issue 2)

Choose the correct option for what you want to import from the following radio buttons:

- Merge All Zones and Locations •
- Select an Entire Zone to Merge
- Select a Single Location to Merge

| Imp | Import Merge Radwin Database - Page 2 of 4 | | | | | |
|--|--|----------------------------------|--------------------------------|--------|--|--|
| £ ⁴ € | Select the folder of the Radwin database to Import from. This will be the PDA's database path. MS Active Sync should be configured to synchronise files, and the database path on the PDA should have been | | | | | |
| Imp | ort Database: | C:\radwin\Customer Data\1 | 00723 - Teksal | Browse | | |
| Into |) Current Database: | C:\radwin\Customer Data\1 | 00930 - Accurate Detection | | | |
| ∟D | atabase Merge Options (I | tems that do not exist in the ta | rget database will be copied) | | | |
| | Zone: | All Zones | | | | |
| | Location: | All Locations | | | | |
| Merge All Zones and Locations Select an Entire Zone to Merge Select a Single Location to Merge Copy the Database Configuration for Locations that already exist | | | | | | |
| | Save Import Configuratio | in | << Previous Next >> | Cancel | | |

Choose the correct option for what you wish to copy to your existing database.

- Manual Files are those which has been manually downloaded from a logger.
- Imported files are those which have been imported from another database.
- User files are those which have been modified by the user (e.g. changing the options in Radcom View)

If you wish to overwrite any data within your current database with manually downloaded data, then select the 'Merge Manual Files into Archive Files' checkbox. Click the Next button.

| Import Merge Radwin Da | tabase - Page 3 of 4 |
|---|---|
| Import Data From: Zone: Location: | C:\radwin\Customer Data\100723 - Teksal All Zones All Locations |
| Manual Files Copy Manual Files Merge Manual Files into C Include All Files | Copy Imported Files Copy User Files Archive Files (overwrites data in archive file with data from matching manual file) C Only Include Files Containing Data Up To |
| ** Include All Files | |
| Save Import Configuration | Next >> Cancel |

The next screen to appear will be a summary screen where you can check all of the settings which you have just entered. Review your options, and if correct, click Finish to merge the databases.

| Import | Merge Radwin Database - Page 4 of 4 | × |
|---------|--|-----|
| | Select Finish to Import the selected data. Use 'Save Import Configuration' to save this configuration so it may be selected for future imports. This can also create a Windows Desktop Shortcut to perform this | < > |
| Summary | r: PDA - Pocket PC | |
| | Database: C:\radwin\Customer Data\100723 - Teksal rrent Database: C:\radwin\Customer Data\100930 - Accurate Detection | ^ |
