Title – Radwin Database – old format

Made By: AB 23/09/15 (Issue 2)

## How to update an old Radwin Database format to make it compatible with current Radwin versions

With an old version of Radwin Database you may get an error message warning you that the Database is old and can only be used for Read Only – new logger configurations cannot be written to it. If this is the case it is possible to upgrade old Radwin Databases by following this procedure -

The update can be performed using the latest version of Radwin software – firstly ensure the database path is set in Radwin for the 'old' database by going to Radwin View > Configuration > Basic Configuration -

	<b>3</b>				Radcom View V4.65.2 - [Empty 1]					-	□ ×
		Download Options Graph Options	Data Options	Advanced	Configuratio	n Start Window	Help				_ 8 ×

## Select the Database tab and the Browse button -

	System Con	figuration : View - I	Basic	×					
Radwin All	Database - Select the database location, Local or Network Server, or Internet based (FTP site). If the database is Local or on a Network Server, enter the database path (where the logger database and Database System Selections Startup Graph Options Graph Colours/Styles Graph Titles Printing Database Location								
Data Generator	Local PC or Network Server Internet (FTP site) Local or Network Server Databa:		Logger Identity Selection Method:	3					
Remote Alarm R	Database Path:	C:\My Documents\C	Customer Services\HWM I 🚽 Browse	)					
	🦳 Mirror Database Path:	C:\Radwin\DATA2	Browse						
_			OK Cancel						

From the Browse button locate your old Radwin Data folder (see supplementary guide if you have trouble doing this) and Select and open the database so it appears as the Database path above.

Then– go to Radwin 'Setup', 'Options' menu, 'Database Utilities', and 'Update Database Version...'.

NOTE - If multiple users are looking at this database, all copies of Radwin will need to be updated as they will not be able to view the database after it has been updated.
