# How to configure your Windows 10 PC for use with MC Touch PC Software

### Step 1 Download and configure the MCTouch PC Software

Download Touch Pro Software PC software from the HWM or FCS Website Extract the SW-068-01 102 - PE MCT PC Software to desktop Right click on SW-068-01 102 - PE MCT PC Software icon Then click > Properties > compatibility > Run compatibility trouble shooter Click > Try recommended settings > Test the program The MicroCorr Touch Software should now launch Click > Next > Yes, save these settings for this program > Close.

### Step 2 Download and install Windows Mobile Device Driver and configure it for your PC

To determine whether your version of Windows 10 is 32-bit or 64-bit, click **Start**, right-click **Computer**, and then click **Properties**. The version is listed after System Type.

- 32-bit version download
   On the Hwmglobal website > Touch pro support > Windows Mobile Device Centre for 32-bit Systems.
- 64-bit version download
   On the Hwmglobal website > Touch pro support > Windows Mobile Device Centre for
   64-bit Systems

Click > Start > Search > Computer Management

Click > Services & Applications > Services.

Scroll down and right-click on "Windows Mobile-2003-based device connectivity" select Properties > Log On.

Switch to "Local System account" with checking "Allow service to interact with desktop" then click OK.

### Step 3 Communicate with MCTouch basestation.

Connect MC Touch Basestation to the PC using the USB cable and switch it on. Open Windows Mobile Device Driver – allow it time to connect to the Touch base station.

Select 'connect without setting up your device'

### **Option 1 – quick view without saving**

Open MCTouch PC software > File > Open -

Browse for the device (Windows CE in this example) open Nandflash and the Data folder

🌁 Open					×
Look in:	Windows	E	•	⇔ 🗈 💣 📰▼

### **Option 2 – Save correlation files to your PC and view with MCTouch software**

Connect the MCTouch basec station to tyour PC and open Windows Mobile device Center -

Ensure the device is 'connected' and open 'File Management' > 'Browse the contents of your device' – find the device (in this example its WindowsCE) and open it, open the Nandflash folder and the Data folder. Locate the correlation file(s) you are interested in and save them to a folder on your PC 'C' Drive (in Documents).
