

**Ref: FAQ-0046****Version: 1.0****Title – RTL SIM Card APN Details****Made By: KE_180614 (Issue 1)****Question –****What Email and NTP settings are required to get an Ethernet Wi5 to work with the GNET24 Server and Web Application?****Settings for GNET24**

The correct settings for Ethernet Wi5 units are as follows;

The email and NTP addresses are the same, note that hubs with firmware version 7.11 will accept an internet (DNS) name; previous versions required the IP address.

SET NTP PROTO is only supported from firmware v6.8

SET EMAIL SMTP	gnet24.com (Version 7.11 or above.)
SET NTP ADDRESS	78.109.169.84 (Versions 7.10 or earlier.)
SET NTP PROTO	0
SET EMAIL PORT	13
SET EMAIL USER	<set to hub ID>
SET EMAIL PASS	<set to hub ID>
SET EMAIL TO	email@gnet24.com
SET EMAIL FROM	<hub ID>@gnet24.com
